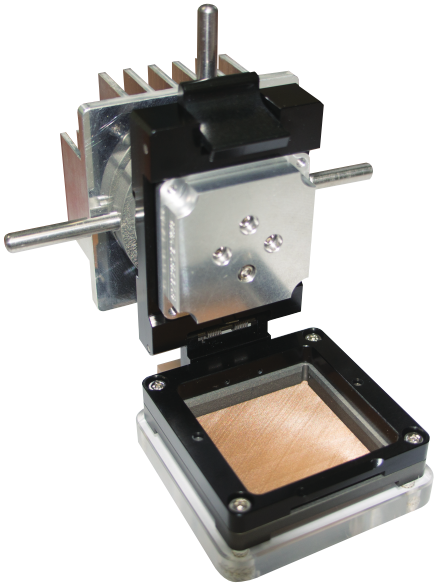
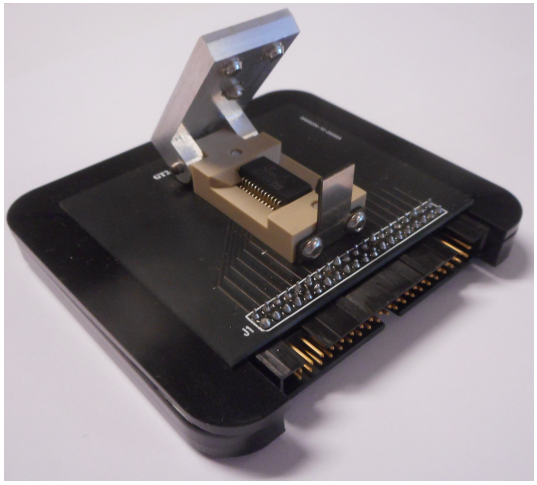
# REDTest

STEERED Technology

## Semiconductor and Device test modules





## QUICK FACTS

**Test Fixtures / test modules**:
- Verification and characterisation testing.
- Low contact resistance and electrical almost neutral.
- Test BGA´s without solder ball damage.
- Easy maintenance, field replaceable.
- Also suitable for LED's passive components, sensors etc.

**Device test modules:**
- Device with FFC, FPC or FEC testing examples LCD, Memory board, Keyboard, touch screen etc.
- Easy in use, low applied cost.
- Quick turnaround for customer specific model or generic models.

## PRODUCT APPLICATION

- R&D companies
- Semi-conductor industry
- Sensors manufacturers
- Test & Measurement
- LCD, Flex module manufacturers
- EMS

## FEATURES AND BENEFITS

- Almost neutral from electrical point of view so suitable for high speed testing
- Reliable in performance critical applications.
- Durability to beyond 75.000 cycles for excellent price/performance.
- Easy to connect, easy to operate.
