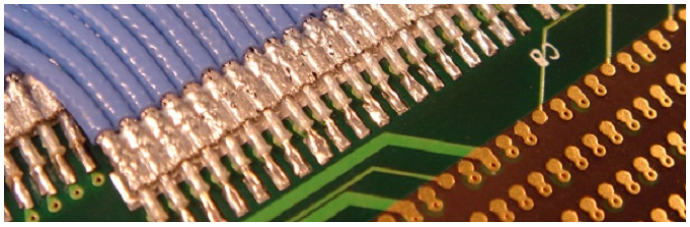
Ribbon Coax Solutions

For board to board and above board applications

QUICK FACTS

- Ribbon coax high performance interconnect solution.
- Only 3 mm assembled height.
- Up to 36 coax lines.
- 32 AWG standard cable and 28-36 AWG possible.
- Flexible in bonded length.
- Used with standaard interposer or custom design.



- Reduce cost and complexity by taking the the high speed signals out of your board and route them via these high speed ribbon cables.

PRODUCT APPLICATION

- Test & Measurement
- Military
- Aerospace
- Medical
- Analytical instruments
- Emulators and programmers
- Switches and routers

FEATURES AND BENEFITS

- Fills the gap in high performance board connections needed today.
- Allows signal rounting above the board not through the board.
- Excellent electrical performance in high frequency range.
- Reliable under severe conditions.
- Full system design, support, one partner for the complete solution.
- Low height increases design freedom.
